ITER COUNCIL MEETS: NOTES SIGNIFICANT PROJECT PROGRESS

During its ninth meeting in Cadarache (France), the Council noted a highly productive period of project execution under the ITER Organization's leadership, including the successful efforts to advance ITER design and construction, contain costs and minimize delays, especially in the face of the Great East Japan earthquake. This ITER Council was chaired by Academician Evgeny Velikhov. Dr. Hideyuki Takatsu of Japan will succeed him as Chairman of the ITER Council on 1 January, 2012.
