SECOND SUCCESSFUL TEST FOR THE ITER ITINERARY

Saint Paul-lez-Durance, France (8 April 2014)—The second ITER Itinerary test convoy, replicating the weight and dimensions of ITER's most exceptional loads, arrived successfully at the ITER construction site on Tuesday 8 April at 3:45 a.m.

The 33-metre-long customized trailer, with its mock load of concrete blocks weighing 800 tons, had begun its journey in the town of Fos-sur-Mer on the Mediterranean S
