for

Global Maintenance Services Contract

Questions

1. General Company Information

Could you please indicate:

Company name

Company information (e.g. sector, field, expertise)

Contact information including name, email address, telephone number, postal address

Number of contracts and number of customers for:

- maintenance works
- outages works
- investment projects works/installations

Your estimated international market share for daily on-site maintenance services in the nuclear industry with the similar scope of work described in the presentation

Who are your main competitors and how do you think you are differentiating yourselves compared to them?

Your experience and references for similar services indicating: location, client, scope of services

Do you have a subsidiary or a branch office near by the IO? If yes, where is it located?

We consider that reactivity is the key for this type of services. If your answer is no to the question h), how are you going to ensure this reactivity (for example, forming a consortium or opening a branch office etc.)?

2. Contract Specific Questions

Could you please indicate:

2.1

- e. Will you be able to offer new installation or Outages/Planned Shutdown (LTM) activities in the scope of work?
- f. If you have answered yes to question e), please indicate for what kind of new installation works (piping works, equipment installations, vessels, etc.)
- g. Slide 12 explains the main activities expected under this contract. However, we would like to know if there are any other activities that could be included in this contract. What other services that you offer could be of interest to the IO in the context of our maintenance strategy?

2.3 Contract model vs possible options (Referring to slides 17 to 21)

- h.
